**Important Notice**

**Goat Greetings!**

We are excited to be helping with your Brush Abatement/Fire Break needs. We will be working in the neighborhood, on the open space, hillsides, and banks. The goats are hard workers and can be enjoyable to observe. Please practice these precautions that need to be taken while viewing and when approaching the herding "Worksite".

**~Respect the herd and follow these rules~**

- No dogs are permitted to approach the work site. We have dogs that protect the herd. Please do not interfere with their duties. Bringing your pets to the work area creates disturbances for the herd.
- When work is adjacent to your lot/property and you have pets, please take extra care to secure your pets during this phase.
- Children must be accompanied by an adult when viewing the goats.
- Goats are fun to watch, please keep yourselves at a respectful distance.
- **NEVER FEED THE GOATS!!!** The goats have a job to do which requires them to eat brush. The hand feeding of goats may accidentally cause them to bite you. The offering of anything that would be perceived as food for the goats will excite the herd. The results could be, goats escaping enclosure, with possible damages to property, goats or persons.

A nursery might be on site. You are welcome to visit with the newest additions to the herd. Feeding times will be posted. Please do not bring your pets to this area.

**Note:** If you notice loose goats, stray dogs, trespassers or any other Goat/Work related issues, please call immediately. Your information, concerns, or questions are greatly appreciated.

We are sure you will come to love the goats as much as we do. Goats are effective in treating High fire hazard areas; directly contributing to the safety of lives and your property. Enjoy your community project. Thank you sincerely E.L.M.
