**INSPECTION AND ABATEMENT  
WARRANT (FORCIBLE ENTRY)**

Code of Civil Procedure §§ 1822.50 *et seq.*  
Health and Safety Code §§ 2040 – 2050

Case No. E2016-~~622~~ 622

12 The People of the State of California to any Vector Control Technician, Department of  
13 Environmental Health for the County of San Diego: PROOF, by declaration, has been made this  
14 day before me by Senior Vector Ecologist Greg Slawson, (1) that *Aedes aegypti* mosquitoes are  
15 present and breeding in the area within the City of San Diego bounded by F Street on the  
16 north, Market Street on the south, Raven Street on the east and Quail Street on the west,  
17 and that the presence of the Zika virus has been confirmed in the same area. These  
18 conditions are a public nuisance in violation of Chapter 1 of Division 3 of the Health and  
19 Safety Code (“Mosquito Abatement and Vector Control Districts”) and of Chapter 2 of  
20 Division 4 of Title 6 of the San Diego County Code of Regulatory Ordinances (“Vector  
21 Abatement and Control”). Mr. Slawson has shown that this nuisance must be abated to  
22 prevent or to mitigate a threat to public health.

23 FURTHER PROOF, by declaration, has been made this day before me by Mr.  
24 Slawson that an attempt was made on September 6, 2016 to serve a warrant directing  
25 inspection and the abatement of mosquitoes within the exterior of the above premises,  
26 and that this work could not be completed because an occupant refused to permit the  
27 lawfully authorized inspection and abatement, or because no one answered at the  
28 residence door and gates were locked.

**INSPECTION AND ABATEMENT WARRANT (FORCIBLE ENTRY)**

1 YOU ARE HEREBY COMMANDED, during any daylight hours, to inspect the  
2 premises identified above, excluding the interiors of structures on the properties, to determine  
3 whether conditions conducive to mosquito breeding exist, whether mosquito breeding is  
4 occurring, and to determine to the extent feasible whether adult or larval *Aedes aegypti*  
5 mosquitoes are present. You may collect adult and larval mosquitoes for further study at  
6 Department of Environmental Health facilities as necessary to support these determinations.

7 YOU ARE FURTHER COMMANDED to abate any mosquito breeding that is confirmed  
8 in this area by your inspection, and to prevent further breeding, by the following means only:  
9 emptying standing water from containers, applying larvicides to standing water, and introducing  
10 mosquito fish to standing water.

11 YOU ARE FURTHER COMMANDED to the extent feasible to kill adult *Aedes aegypti*  
12 mosquitoes known or suspected to be present on all premises, by the following means only:  
13 dispersing Pyrenone 25-5 insecticide using calibrated ultra-low volume portable equipment.

14 YOU ARE FURTHER COMMANDED and to reduce the potential for future mosquito  
15 breeding at identified breeding sites by the following means only: applying Demand CS  
16 insecticide using a hand-held sprayer.

17 Good cause having been shown, you may perform these tasks during any daylight hours  
18 after 8 a.m., without 24 hour prior notice to the owner or occupant, and without the presence of  
19 an owner or occupant of the premises that you are inspecting or abating. You may enter any  
20 outdoor area, and may cut or defeat locks or latches and remove or relocate obstacles if  
21 necessary to achieve entry.

22 This Inspection and Abatement Warrant shall be effective for a period of fourteen (14)  
23 days from the date of issuance specified below.

24 Given under my hand, and dated this 6 day of September, 2016.
