

SUPERIOR COURT OF CALIFORNIA
COUNTY OF SAN DIEGO

In re: Occupants of Properties

Area bounded by F Street on the north,
Market Street on the South, Raven
Street on the east and Quail Street on the
west, City of San Diego.

**INSPECTION AND ABATEMENT
WARRANT**

Code of Civil Procedure §§ 1822.50 et seq.
Health and Safety Code §§ 2040 - 2050

The people of the state of California to any Vector Control Technician,
Department of Environmental Health for the County of San Diego: PROOF, by
declaration, has been made this day before me by Senior Vector Ecologist Greg
Slawson, that *Aedes aegypti* mosquitoes are present and breeding in the area within
the City of San Diego bounded by F Street on the north, Market Street on the
south, Raven Street on the east and Quail Street on the west, and that the presence
of the Zika virus has been confirmed in the same area. These conditions are a
public nuisance in violation of Chapter 1 of Division 3 of the Health and Safety
Code ("Mosquito Abatement and Vector Control Districts") and of Chapter 2 of
Division 4 of Title 6 of the San Diego County Code of Regulatory Ordinances
("Vector Abatement and Control"). Mr. Slawson has shown that this nuisance must
be abated to prevent or to mitigate a threat to public health.

YOU ARE HEREBY COMMANDED, during any daylight hours, to inspect
all premises located in this area, excluding the interiors of structures on the
properties, to determine whether conditions conducive to mosquito breeding exist,
whether mosquito breeding is occurring, and to determine to the extent feasible
whether adult or larval *Aedes aegypti* mosquitoes are present. You may collect
adult and larval mosquitoes for further study at Department of Environmental
Health facilities as necessary to support these determinations.

1 YOU ARE FURTHER COMMANDED to abate any mosquito breeding that
2 is confirmed in this area by your inspection, and to prevent further breeding, by the
3 following means only: emptying standing water from containers, applying
4 larvicides to standing water, and introducing mosquito fish to standing water.

5 YOU ARE FURTHER COMMANDED to the extent feasible to kill adult
6 *Aedes aegypti* mosquitoes known or suspected to be present on all premises, by the
7 following means only: dispersing Pyrenone insecticide using calibrated ultra-low
8 volume backpack equipment.

9 YOU ARE FURTHER COMMANDED and to reduce the potential for
10 future mosquito breeding at identified breeding sites by the following means only:
11 applying Demand CS insecticide using a hand-held sprayer.

12 Good cause having been shown, you may perform these tasks during any
13 daylight hours, without 24 hour prior notice to the owner or occupant, and without
14 the presence of an owner or occupant of the premises that you are inspecting or
15 abating. You may enter any outdoor area that is not locked but may not enter any
16 area by force.

17 This Inspection and Abatement Warrant shall be effective for a period
18 of fourteen (14) days from the date of issuance specified below.

19 Given under my hand, and dated this

20 6th Day of Sept, 2016
