

FORGING A SUSTAINABLE FUTURE

Economically
Environmentally
Culturally

A two part series beginning November 2011 and culminating in our master event featuring Robert F. Kennedy, Jr. in March 2012.

Please join us for our workshops this November and help develop our presentation architecture. Our presentations will reflect our theme of an economic, environmental and culturally sustainable future.

This symposium and town hall style workshop will focus on three areas of sustainability in the San Diego/Tijuana region; agriculture, water and energy.

- Be part of something big!
- Donations will help fund the main event
- Opportunity to collaborate with other leaders in business, government and academia
